- Marathi

PROFILE

I'm a 20-year-old female software engineer with 2 years of hands-on learning and personal project experience. My passion lies in frontend development, where I've built a strong foundation in modern technologies like Next.js, React.js, Supabase, TypeScript, and JavaScript.

Even during my learning and project experience, I've gained strong skills in designing user interfaces that are simple, visually appealing, and user-friendly. I enjoy learning new technologies, improving my frontend skills, and pushing the boundaries of web development.

WORK EXPERIENCE

Udemy

2024-2025

Skill Development & Learning

- Completed Next.js and React.js course on Udemy, gaining hands-on frontend experience.
- Practiced Figma-to-code implementation, responsive design, and TypeScript integration.
- Built personal mini-projects to strengthen frontend coding, debugging, and UI/UX skills.

Fiverr

2024 - PRESENT

Freelance Software Engineer

- Build web projects using React.js, Next.js, TypeScript, Supabase, and Tailwind CSS, focusing on responsive and user-friendly designs.
- Work closely with clients to understand their needs, suggest solutions, and turn designs into working web pages.
- Keep learning new skills and improving my work, making sure projects are fast, maintainable, and visually appealing.

FEATURED PROJECTS

ReactJS — Real Estate Web Application

<https://real-estate-app-aan7.vercel.app>

Technologies: React.js, TailwindCSS, Firebase Authentication, React Router, Context API, Framer motion

- Developed a responsive real estate web app based on Figma design.
- Implemented dynamic property listings fetched from API for sale and rent.
- Integrated Firebase Authentication for secure signup and login.
- Maintained user state with Context API / localStorage.
- Ensured pixel-perfect UI and responsive design across desktop and mobile.

NextJS — Artistly Talent Platform

<https://artistly-rouge.vercel.app>

Technologies: Next.js, Tailwind CSS, ShadCN UI, Framer Motion

- Developed a responsive, mobile-first platform to showcase diverse artists including singers, DJs, dancers, speakers, and visual creators.
- Built media-rich, animated user profiles while maintaining fast load times and SEO-friendly structure.
- Designed and implemented custom UI components for interactive and expressive user experience.
